## **CNC Machinist**

### **About Us:**

Located in Albury Wodonga, JC Butko Engineering has grown to be the largest general engineering fabricator on the border, with projects encompassing:

- Stainless Steel / Mild Steel / Aluminium
- Exotic Metal Fabrication
- Site Installation
- Pipe & Tube Welding
- CNC Machining
- Factory Maintenance
- In house Laser (8kw), Water Jet Cutting and Press Brake (600T – 6m)

### **Current Opportunities:**

We are currently seeking a **Qualified & Experienced CNC Machinist** for general precision and production machining work.

You will be joining a friendly team environment with a commitment to safety and focus on quality.

Experience in the operation and programming (FANUC) of CNC Machine and Turning Centres is essential for this position.

Previous experience in jobbing type work is also an advantage.

The successful applicant will be required to prioritise and schedule their workload to achieve required completion targets.

This is a permanent position (after qualifying period) with an attractive remuneration (based on previous experience), overtime opportunities and long-term stable employment with a strong pipeline of secured works.

### **Training & Development Opportunities:**

JC Butko offer the following paid Training & Development:

- HRW Training (working at heights, confined space, forklift, rigging, dogman, overhead crane)
- First Aid Training
- Health & Safety Rep Training

If you are looking for a change and are keen for secure long-term employment, career progression, and want to be involved with the delivery of a wide variety of projects, please send your resume via seek to Paul Butko ([pbutko@butko.com.au](mailto:pbutko@butko.com.au)).
